Art Unit: 1756

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Gallagher (43,622) on June 8, 2005.

The application has been amended as follows:

Cancel claims 13 and 42

In claim 12, at line 3, please replace "microstructures" with - - optical liquid- - .

In claim 14, at line 1, please replace "13" with - - 12- -.

In claim 110, at line 1, please replace "100" wiothy - -109- -.

In claim 11, at line 1, please replace "101" with - - 110- -.

2. The following is an examiner's statement of reasons for allowance: The language optical liquid is interpreted through the specification as an orientable dopant, such as a liquid crystal or the like (prepub at [0045-0046]). These do not appear in the references except Sutherland et al and Ingwall. While Sutherland et al. WO 01/90822 does teach contact exposure, contact is not made directly with the photocurable layer as the ITO layers are between the master and the photocurable layer. This is more akin to a proximity exposure, rather than the contact exposure specifically recited in the claims and as contact is not made with the photocurable layer all the holographic diffractive optical elements formation would be due to interference effects. The claims require that non-interference effects cause hologram formation. There is no motivation to remove the ITO layers of Sutherland et al. to allow the type of contact exposure required by the claims.

Art Unit: 1756

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebranndt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
